production, said composition comprising an amount of an antiperspirant active ingredient, said antiperspirant active ingredient being an aluminum chlorohydrate, and said amount being effective to reduce the production of sebum.--

--19. The method according to claim 18, which is for preventing or removing the formation of comedones and/or acne.--

--20. The method according to claim 18, which is for preventing or removing greasy hair.--

--21. The method according to claim 18, which is for preventing or removing dandruff.--

--22. The method according to claim 18, wherein the composition comprises 0.0005-50.0% by weight based on the total weight of the composition of said antiperspirant active ingredient.--

--23. The method according to claim 22, wherein the composition comprises 0.01-20.0% by weight based on the total weight of the composition of said antiperspirant active ingredient.--

USSN 09/891,929

--24. The method according to claim 23, wherein the composition comprises 0.02-10.0% by weight based on the total weight of the composition of said antiperspirant active ingredient.--

--25. The method according to claim 24, wherein the composition comprises 0.2-5.0% by weight based on the total weight of the composition of said antiperspirant active ingredient.--

B<sup>1</sup>  
cont.  
--26. The method according to claim 25, wherein the composition comprises 0.5-3.0% by weight based on the total weight of the composition of said antiperspirant active ingredient.--

--27. A method for controlling blemished skin, acne or seborrheic phenomena, said method comprising topically applying a composition to an area affected by increased sebum production, said composition comprising an amount of an antiperspirant active ingredient, said antiperspirant active ingredient being an aluminum hydroxylactate, and said amount being effective to reduce the production of sebum.--

--28. The method according to claim 27, which is for preventing or removing the formation of comedones and/or acne.--

--35. The method according to claim 34, wherein the composition comprises 0.5-3.0% by weight based on the total weight of the composition of said antiperspirant active ingredient.--

--36. A method for controlling blemished skin, acne or seborrheic phenomena, said method comprising topically applying a composition to an area affected by increased sebum production, said composition comprising an amount of an antiperspirant active ingredient, said antiperspirant active ingredient being an acidic aluminum/zirconium salt, and said amount being effective to reduce the production of sebum.--

--37. The method according to claim 36, which is for preventing or removing the formation of comedones and/or acne.--

--38. The method according to claim 36, which is for preventing or removing greasy hair.--

--39. The method according to claim 36, which is for preventing or removing dandruff.--

--40. The method according to claim 36, wherein the composition comprises
